

# SOFTETCH™

## SoftEtch™

SoftEtch™ is a low iron glass with an etched finish that is unlike any other. This glass is soft to the touch, resists stains and will leave no fingerprints or smudges. The SoftEtch™ advantage is achieved from etching the glass on the tin side as opposed to the air side. The air side of glass is much cleaner and allows EFI to enrich the glass by adding a variety of options from our SoftEtch™ Colour, Pattern or Mirror lines.

*Applications: Conference Tabletops, Desktops, Drawer Facings, Doors, Walls, Sliding Systems, Shelving*

*Attributes: Soft to the Touch, Non-Reflective, No Glare, No Fingerprints, Resists Stains and Smudges, Eco-Friendly, Recyclable*

*Options: Low Iron or Float Glass (Upon Request), Single or Double Sided Etching, Various Thicknesses (4mm, 6mm, 8mm, 10mm, 12mm), Custom Shapes and Sizes, Aluminum Frames, Metal Backing*

# SOFTETCH™ COLOUR

## Standard Colours

Ice White

Sky

Glada

Silk

Mandarino

Rosso

Cafe

Pearl

Black

**Paint:** Available in any colour using our custom colour match system, EFI heat fuses your colour choice to SoftEtch™ or low iron clear glass to achieve the perfect look for your project.

**Ceramic Frit:** Available in select EFI Colours, Ceramic Frit is perfect for larger projects requiring a more durable surface, such as conference tabletops or any application exposed to direct sunlight.

## design idea

For a more striking design, let EFI mirror any of the following glass options for your next project:

- \* Glass Tiles
- \* Bronze/Gray Tinted Glass
- \* Any SoftEtch™ Pattern

*Custom designs require minimum quantities and longer lead times.*

# COLOUR

Lounge Wall

Sliding Door

Door/Accent Wall

Colour is low iron glass that is heat fused with paint or ceramic frit. Use one of EFI's standard colours or let us colour match any hue you have in mind. The result is a highly reflective surface that can transform any environment adding bold and beautiful colours.

*Applications: Drawer Facings, Doors, Walls, Sliding Systems*

*Attributes: Low Iron, Reflective Surface*

## MagnaGlass

Framed

Frameless

MagnaGlass is EFI's magnetic marker board. It is low iron glass with a metal backer and fused in any colour. MagnaGlass comes in two variations, a rounded corner frameless application or enclosed with an aluminum frame. MagnaGlass can also be used in sliding systems which adds functionality, ideal for meeting spaces or business centers. Standard dry erase markers may be used. Earth Magnets are required to hold items securely in place.

*Applications: Meeting Rooms, Business Centers, Restaurant Boards, Sliding Systems*

*Attributes: Low Iron Glass, Reflective Surface, Magnetic*

## design idea

Add a metal backer to any of our glass products, and it instantly becomes a decorative and functional magnetic board that holds to-do lists, reminders or personal photos and memorabilia.

*Patterns etched on the face of the glass (shown) should not be used as a writing surface.*
